

Ayesha Aziz

Frontend Developer | Software Engineer

Guildford, United Kingdom | ayeshaaziz44436@gmail.com | 07455717024

Professional Profile

Experienced frontend developer with 9+ years developing high-performance frontend applications using Angular, NgRx, RxJS, React, JavaScript, and TypeScript. Skilled at delivering component based architecture to enhance code reusability and maintainability, significant improvements in application performance, stability, and user experience.

Core Competencies

- **Frameworks:** Angular, React, RxJS, NgRx, Redux
 - **Languages:** JavaScript, TypeScript, HTML5, SASS, CSS3
 - **Platforms:** Electron, Cordova, Cross-Platform Web/Desktop/Mobile
 - **Backend & APIs:** Node.js, RESTful APIs, WebSockets
 - **Tooling & DevOps:** Git, Jenkins, Perforce, Swarm, NPM, NVM, ESLint, Cordova, Electron
 - **Testing & Debugging:** Jasmine, Karma, JMeter, Protractor, SOAPUI, BDD, TDD
 - **Project Management & Collaboration:** Agile (Scrum), Jira, Confluence
-

Employment History

Extron Electronics - Dartford, UK

Software Engineer

2019 – 2025

- Optimized UI architecture for high-resolution video wall processors, reducing app load times and latency by 30% through targeted refactoring, code splitting, and scalable component library development.
- Implemented **NgRx** and **RxJS** for robust state and data management, significantly enhancing application stability, scalability, and maintainability.
- Established and enforced **TDD/BDD** standards and **SOLID** principles, improving code quality, expediting feature delivery, and reducing post-release defects by 40%.
- Mentored junior developers and promoted a culture of peer review and continuous improvement, accelerating onboarding and elevating overall team performance.

Nicander Ltd - Billingham, UK

Frontend Developer

2015 - 2019

- Designed and developed scalable, modular applications using **AngularJS, Node.js, MongoDB, and C#**, increasing system uptime by 20%.
- Debugged and optimized enterprise **information management systems** for improved performance.
- Developed the **CHARM ATMS** project for Highways England, mainly using Java
- Built service-level **dashboards** for AFMS, enhancing data visualization and reporting.

Saggezza - Sunderland, UK

Software Developer

2014 - 2015

- Built a transaction simulation tool for a Customer Communication Management system.
- Developed real-world CCM transaction testing components to improve test accuracy.

Education

MSc in Computing - University of Sunderland, UK - 2015

MSc in Computer Science - Virtual University, Pakistan - 2012

Postgraduate Diploma in IT - Govt. Post Graduate College, Pakistan - 2007

Soft Skills

- Effective communicator and team collaborator
- Strong problem-solving and analytical thinking
- Comfortable working independently or in cross-functional Agile teams
