

AYESHA AZIZ

Frontend Engineer

Guildford, UK | 07455 717024 | ayeshaaziz44436@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 9+ years building high-performance, accessible web applications. Expert in React/Angular component architecture, responsive design, and performance optimization (30% load reduction). Proven full-stack capability across Node.js, RESTful APIs, and CI/CD-driven delivery. Track record of quality leadership (40% defect reduction via TDD/BDD), team mentoring, and critical infrastructure delivery at scale.

CORE COMPETENCIES

Frontend: React, Angular, TypeScript, JavaScript, RxJS, NgRx, Redux, HTML5, CSS3, Responsive Design, Accessibility, Component-Based Architecture

Backend & APIs: Node.js, Express, RESTful APIs, GraphQL, WebSockets, Supabase, PostgreSQL, MongoDB

Testing & QA: TDD, BDD, Jest, React Testing Library, Jasmine, Karma, Protractor, JMeter, SoapUI, Test Automation

Tools & DevOps: Git, Jenkins, Docker, CI/CD, Jira, Confluence

Practices & Leadership: Agile/Scrum, Sprint Planning, Stakeholder Communication, Mentoring, Code Review, System Architecture, SOLID

PROFESSIONAL EXPERIENCE

Extron Electronics, Dartford, UK

Software Design Engineer | 2019 - 2025 (6 years)

- Optimized UI architecture for high-resolution video wall processors, reducing load times and latency by 30%; implemented NgRx and RxJS for efficient state management, improving stability and maintainability.
- Built an internal Design System and component library adopted across the EMS cross-platform product, improving UI consistency and accessibility.
- Led Agile transformation: established TDD/BDD standards across the team, applied SOLID principles, and cut post-release defects by 40%.
- Facilitated daily standups and sprint retrospectives; identified and removed technical impediments as part of Scrum delivery.
- Mentored junior developers and fostered a strong code review culture.

Tech Stack: React, Angular, TypeScript, C#, RxJS, NgRx, Redux, Jasmine, Karma, Protractor, Jenkins, CI/CD, Cordova, Electron, HammerJS

Nicander Ltd, Billingham, UK

Software Consultant | 2015 - 2019 (4 years)

- Delivered CHARM ATMS and AFMS asset management systems for Highways England, improving system uptime by 20%.
- Transformed raw roadside sensor data into formatted messages for motorway signage and traffic signals via RESTful APIs, improving real-time driver communication.
- Engineered a data processing layer converting sensor telemetry into actionable traffic information displayed on road infrastructure.

Tech Stack: AngularJS, JavaScript, TypeScript, Node.js, Express, MongoDB, GraphQL, C#, WebSockets, RESTful APIs, Java, C#, Jira, Git, Docker

Saggezza, Sunderland, UK

Software Developer | 2014 - 2015

- Built CCM transaction simulation tools, improving QA cycle time by 25%.

Tech Stack: Java, JavaScript, HTML/CSS, SQL Server, Customer Communication Management (CCM) systems

PORTFOLIO PROJECTS & CONTINUOUS LEARNING (2025 - 2026)

Sweet Hub - Full-Stack eCommerce (Personal Project, 2025 - Present)

- Architected full-stack monorepo with shared Redux store, generic CRUD factory, and React Query integration; optimized code splitting across 7 manual chunks (MUI, Recharts, jsPDF), reducing main bundle to 13 KB.
- Built a responsive eCommerce platform (website, management dashboard, and Capacitor mobile app) with real-time inventory sync, order management, and a Supabase PostgreSQL backend; implemented Jest and React Testing Library for comprehensive test coverage.

- Engineered scalable data architecture using generic CRUD patterns, React Query caching, and Supabase integration; implemented PDF generation, barcode scanning, and real-time inventory updates across 9 database tables.

Tech Stack: *React 18, TypeScript, React Query, Redux Toolkit, Supabase, PostgreSQL, Jest, React Testing Library, Capacitor*

EDUCATION

MSc Computing - University of Sunderland, 2015 | MSc Computer Science - Virtual University, 2012

KEY ACHIEVEMENTS

- 30% Load Reduction: Enterprise video processor performance optimization (Extron)
- 40% Defect Reduction: TDD/BDD standards implementation and team mentoring (Extron)
- 20% Uptime Improvement: Scalable architecture for Highways England critical infrastructure (Nicander)
- Team Leadership: Mentored 4+ junior and 2 senior developers; established architecture standards across organizations
